

Red Parachute Rocket L-35

DESCRIPTION:

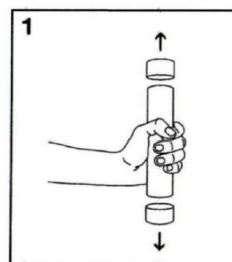

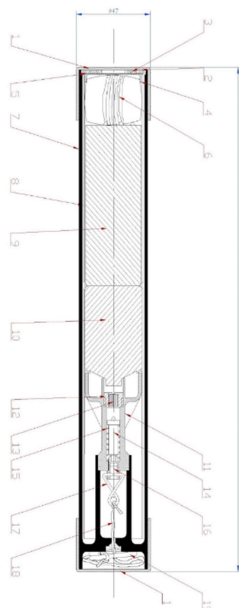

Distress handheld signal to be used in rafts, lifeboats, and all types of boats and vessels. Especially designed to comply with SOLAS 74/96 and IMO Res.MSC.81(70) regulations. It withstands exposure to extremely adverse weather conditions and functions properly even after being submerged under water. Rocket to be launched by hand and stabilization with windows. It expels an intense red light to a more than 300 metres height supported by a parachute. Easy grip and quick workability in emergency situations by only unscrewing the cap.

APPLICATION:

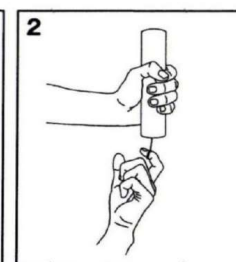

As a distress signal s for all kinds of boats, it is suitable for day or night use. It assures long distance visibility.
